

## CASE STUDY

# Bristol Myers Squibb

The site at Devens has required a combination of modular units to provide temporary space to support the Bristol Myers Squibb's manufacturing facility construction project. Triumph Modular has provided more than 36,400 sq ft of modular space for office, conference, orientation, safety, and bathroom facilities. Over a period of 12 months, Triumph has reacted to the growing need of the custom temporary space the project has demanded. The buildings are Triumph's "ProSpace" style modules, which include T1-11 exterior siding, steel exterior doors, vinyl insulated windows, vinyl covered gypsum interior walls, providing a comfortable, professional working atmosphere necessary for the extensive project. The team of Parson Commercial Technology, Skanska USA Building Company and Triumph Modular, plan to be working together on this project for the next 5-8 years.

- **Location:** Devens, MA
- **Sq. Footage:** 36,460
- **No. of Modules:** 51
- **Completion Date:** July 2008
