

CASE STUDY

Aggregate Industries

Triumph provided Aggregate Industries with a custom modular 12 x 60 scale house in Littleton, MA. The custom modular structure supports a team of 3-4 employees daily, serving both the inbound and outbound traffic for the sand, stone and gravel operation.

The custom modular is equipped with two heavy duty drive up windows with transaction drawers to withstand the constant opening and closing necessary for each business transaction. This custom application also provides the drivers on the scales, and the dispatcher in the trailer protection from weather elements while decreasing the duration of each individual transaction.

- **Location:** Littleton, MA
- **Sq. Footage:** 672
- **No. of Modules:** 1
- **Completion Date:** April 2008
