

## CASE STUDY

# Bishop Feehan High School

The Bishop Feehan High School required immediate classroom space during the renovation of the school's convent into new classroom space, as well as additional space to address growing enrollment. Along with construction and project management services, Triumph provided the school with six classroom modules, totaling 4,320 sq ft, which abutted the existing school building. From permit application to certificate of occupancy, the project was completed in just 3 months.

"Triumph provided an excellent service at a very competitive price," said Bill Runey, Principal of Bishop Feehan High School. "The teachers and students have been very pleased with the units and new classroom space"

- **Location:** Attleboro, MA
- **Sq. Footage:** 4,320
- **No. of Modules:** 6
- **Completion Date:** August 2007
