

# Bethany Healthcare

Permanent Administrative Space

Bethany Healthcare's growing accounting department required more office space, and Triumph Modular stepped in to help.

Due to permit requirements, the project was completed in two phases. First, a temporary 24' x 64' modular building was installed. Once the permit issues were resolved, Triumph Modular relocated the building and added an extra center module to create a permanent three-piece modular structure for the accounting department.

Before the relocation, Triumph Modular performed extensive site preparation, including tree removal, installing a retaining wall, foundations, poured walkway, and site-built ramp and steps. The completed project provides a welcoming and efficient space for Bethany Healthcare's expanding accounting team.
